ROWE/Ami

LASERSTAR® SATURN™ CD-1001

The Model for the Year 2000

Designed to boldly go where no other jukebox has gone before, the Saturn features two new and dramatic black light graphics, created with a super-advanced "Live Edge" material for an exciting, futuristic effect. The colorful rotating pilaster lights are sure to grab and hold customers' attention. And the state-of-the-art backlit glass-surfaced keyboard by Touch Sensor Technologies makes selection easier than ever.

The Saturn's title display is designed to merchandise music and stimulate maximum customer play:

- 12 full-sized CD jackets are displayed beside easy-to-read title strips.
- The motor-driven pages flip vertically for easier reading and will accommodate up to 100 CD album covers and title strips.
- In the "attract mode," the title pages turn automatically or move to a specific page number.
- Set on autoplay, the Saturn automatically plays a random or pre-selected track at specific time intervals.

Equipped with the reliable ROWE CBA-2 Bill Acceptor, the Saturn takes \$1 and \$5 bills and has a 1,000 bill stacker.

Options

- Rowe's infrared remote control is the most advanced available. Remote selection, volume and reject controls are just a few of its features.
- The printer kit and/or modem provides full MIS reports, including cash totals, selection frequency of each track and album, and problems with any given disk. Recommended printers and modems may be purchased at your local supplier.
- The programmable, scrolling LED attract mode message display features up to 27 characters (2" high) per message in eight colors. Rainbow effects are possible.
- The unit is CDV- and karaoke-capable.

Integrate the Saturn with any ROWE/AMi Selector unit and add the advantage of remote selection to any location.
