

The new **StarGlo**TM CD Jukebox from Rowe.

PROFITS AT LIGHTSPEED.

Rowe's new **StarGlo** has the features you asked for. Features that draw a crowd and keep them coming back for more. Features that increase your bottom line. Features like: Pulsating lights that flash to the beat and welcome patrons to its user-friendly control panel. LED lighting—no heat, no hassles, 100,000 hours MTBF and **My Song First** generate even more operator revenues.

To experience the StarGlo call your Rowe distributor.

LaserStar StarGlo™ CD 100K

StarGlo's new pulsating lights stimulate maximum customer attention and play. The rhythm of these attention drawing lights can be controlled to follow the beat of the music or any desired rhythm by use of the remote control or programming directly at the jukebox. The new lighting uses 100,000 MTBF (lifetime) LEDs instead of bulbs or fluorescent lights (which burn out) and their heat generating ballasts.

When the customer approaches, the new Proximity Lighting stops the lights from pulsating in the title display area. This provides a clear, bright white light for easier reading of titles.

The new **VF** (vacuum fluorescent) **Display** is easier to read.

StarGlo's "My Song First" option allows customers to spend additional credits and have their selection played next. A lighted button will let customers know when this option is available.
